

Top 12 IT PowerPoint Presentation Template Sites

Information Technology (IT) is the branch of engineering that deals with the use of computers and telecommunications to store retrieve and transmit information. The acquisition, processing, storage and dissemination of vocal, pictorial, textual and numerical information by a microelectronics-based combination of computing and telecommunications are its main fields.

The term in its modern sense first appeared in a 1958 article published in the Harvard Business Review, in which authors Leavitt and Whisler commented that "the new technology does not yet have a single established name. We shall call it information technology (IT)".

Some of the modern and emerging fields of Information technology are next generation Web Technologies, Bioinformatics, Cloud computing, Global information systems, large scale knowledge bases, Country Population Database etc. Advancements are mainly driven in the field of computer science.

Jazz presentation technical team has done research on the PowerPoint Presentation sites on the web and have identified list of sites which has excellent IT and Computer Presentation Templates. This can be a good and quick place to get started if you are looking for templates for your IT Presentation.

Few Points to remember during a presentation which was given by Steve Jobs, the icon of Apple Inc

- Build your structure of presentation
- Apply the following "Three" principle
 - Why people listen to you
 - Keep the audience away from the slides
 - Memorize your presentation
